Because we care more.

THE EVOLOGICS DIFFERENCE | WE CARE MORE

EVOLOGICS is a biologics company committed to improving lives. Our culture places people, first – from patients to doctors to our team. Our mission is to make lives better through cutting-edge biologics.

Since 2009, **EVOLOGICS** has been providing the highest-quality biologics products throughout the United States, ensuring your patients receive the care they deserve in a cost-effective manner. At **EVOLOGICS**, we do more, we work harder and we care more. That's what makes the difference.

WHAT WE OFFER

EVOLOGICS offers a wide array of AATB accredited products specifically for foot and ankle surgery, including amnion, soft tissue, bone, DBM and more.

THE EVOLOGICS DIFFERENCE

- AATB-Accredited Products
- Dedicated, One-on-one Customer Service
- Evologics PASCO₂™ Allograft Technology
- The Highest-Quality Products

OUR COMMITMENT TO THOSE WHO SERVE OUR COUNTRY

EVOLOGICS is 100% committed to providing only the highest-quality products to the men and women who honorably serve or have served our country, and their dependents. It is with great pride we continually strive to offer you cutting-edge products designed to repair and regenerate soldiers and their loved ones, allowing them to live longer, healthier lives.

PRODUCT NUMBERS AND PRICING

DAPA #SP0200-15-0049

Riverwalk Enterprises

PRODUCT CODE	DESCRIPTION
DBM PUTTY & CRUSH MIX	
EHG-01C	DBM CRUSH-MIX 1cc
EHG-02C	DBM CRUSH-MIX 2.5 cc
EHG-05C	DBM CRUSH-MIX 5 cc
EHG-10C	DBMCRUSH-MIX 10cc
EHG-01P	DBM PUTTY 1cc
EHG-02P	DBM PUTTY 2.5cc
EHG-05P	DBM PUTTY 5cc
EHG-10P	DBM PUTTY 10cc
DBM CUBES & STRIPS	
EV73010	DBM CUBE 10x10x10mm
EV73012	DBM CUBE 12x12x12mm
EV73014	DBM CUBE 14x14x14mm
EV50205	DBM BONE SPONGE 50x20x5mm
EVS 26197	DBM Sponge, 26 x 19 x 7mm
SYNTHETICS	
EBF1-100X25-05	SYNTHETIC GRANULES IN A COLLAGEN 50x10x5mm 2 STRIPS 5cc
EBF1-100X25-10	SYNTHETIC GRANULES IN A COLLAGEN 100x25x4mm, 1 STRIP 10cc
EBF1-100X25-15	SYNTHETIC GRANULES IN A COLLAGEN 100x25x6mm 1 UNIT 15cc
CUSTOM FOOT WEDGES	
EVFWC-1	LARGE FOOT WEDGE WITH CORTICAL BACKING
EVFWC-2	SMALL FOOT WEDGE WITH CORTICAL BACKING
EVFWC-3	MEDIUM FOOT WEDGE WITH CORTICAL BACKING
EVFWC-3A	MED-LARGE FOOT WEDGE WITH CORTICAL BACKING
EVFWC-4	MEDIUM PLUS FOOT WEDGE WITH CORTICAL BACKING
CANCELLOUS CHIPS & CUBES	
EV10005	CANCELLOUS CRUSHED 1-4mm, 5cc
EV10010	CANCELLOUS CRUSHED 1-4mm, 10cc
EV10015	CANCELLOUS CRUSHED 1-4mm, 15cc
EV10030	CANCELLOUS CRUSHED 1-4mm, 30cc
EV11010	CANCELLOUS CRUSHED 4-10mm, 10cc
EV11015	CANCELLOUS CRUSHED 4-10mm, 15cc
EV11030	CANCELLOUS CRUSHED 4-10mm, 30cc

PRODUCT NUMBERS AND PRICING

TENDONS	
AT652FF	ANTERIOR OR POSTERIOR TIBIALIS TENDON
AT290FF	ACHILLES TENDON
AT292FF	BTB TENDON, HEMI
AT393FF	GRACILIS
AT392FF	SEMITENDINOSIS FROZEN GRAFT/ TENDON
AT293FF	PRE-SHAPED BTB TENDON
AT294FF	PERONEUS LONGUS
PS652FF	ANTERIOR OR POSTERIOR TIBIALIS TENDON - NON IRRADIATED
PS290FF	ACHILLES TENDON - NON IRRADIATED
PS393FF	GRACILIS - NON IRRADIATED
PS392FF	SEMITENDINOSIS FROZEN GRAFT/ TENDON - NON IRRADIATED
PS293FF	PRE-SHAPED BTB TENDON - NON IRRADIATED
PS294FF	PERONEUS LONGUS - NON IRRADIATED
AMNION PATCH	
EAP11	EVOLOGICS AMNION PATCH 1 x 1 cm
EAP22	EVOLOGICS AMNION PATCH 2x2 cm
EAP23	EVOLOGICS AMNION PATCH 2 x 3 cm
EAP44	EVOLOGICS AMNION PATCH 4 x 4 cm
EAP46	EVOLOGICS AMNION PATCH 4 x 6 cm
EAP48	EVOLOGICS AMNION PATCH 4 x 8 cm
AMNION FLUID	
EAF 05	.5ml AMNION FLUID
EAF 10	1.0ml AMNION FLUID
EAF 20	2.0ml AMNION FLUID
EAF 05C	.5ml AMNION FLUID, CRYOPRESERVED
EAF 10C	1.0ml AMNION FLUID, CRYOPRESERVED
EAF 20C	2.0ml AMNION FLUID, CRYOPRESERVED

DAPA #SP0200-17-H-0058

Eborico

DBM FIBER BOATS	
EVb100205	DBM FIBER BOAT 100x20x5 mm
EVb502005	DBM FIBER BOAT 50x20x5 mm

EVOFLOW	
EVf10	1.0 ml EVOFLOW
EVf15	1.5 ml EVOFLOW
EVf20	2.0 ml EVOFLOW

PRODUCTS

EVOGRAFT™ DBM PUTTY

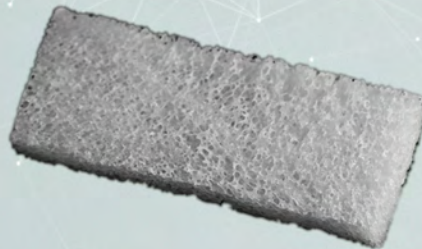

EVOGRAFT™ DBM PUTTY is formulated to resist irrigation with each lot tested to confirm osteoinductive potential. Evologics offers multiple sizes to address a wide array of procedures, including foot and ankle, trauma and extremities, knees, hips, craniomaxillofacial, spine and more. DBM can be used to augment autologous cancellous or corticocancellous grafts, and used in craniofacial surgery, spinal fusion, hand and foot surgery, joint reconstruction and fracture repair.

EVOGRAFT™ DBM CRUNCH

EVOGRAFT™ DBM Crush is 100% demineralized bone matrix cortical ground mixed with mineralized cancellous chips. Evograft DBM Crush is formulated to resist irrigation with each lot tested to confirm osteoinductive potential. DBM can be used to augment autologous cancellous or corticocancellous grafts, and used in craniofacial surgery, spinal fusion, hand and foot surgery, joint reconstruction and fracture repair.

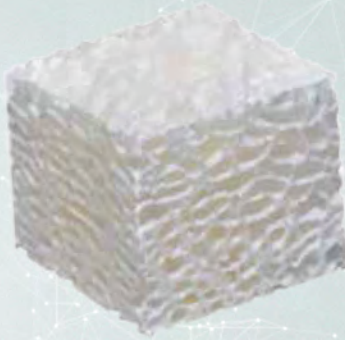

EVOGRAFT™ DBM STRIP

EVOGRAFT™ DBM Strip consists of 100% demineralized bone matrix made from a single piece of cancellous bone, exposing essential growth factors to promote new bone formation. Upon compression, the strips will expand to its original state, filling the void and minimizing the space between the graft and host bone. DBM can be used to augment autologous cancellous or corticocancellous grafts, and used in craniofacial surgery, spinal fusion, hand and foot surgery, joint reconstruction and fracture repair.

PRODUCTS

EVOSPONGE™ DBM CUBE

EVOSPONGE™ DBM Cubes are 100% human allograft and undergo a specialized demineralization process designed to maintain bone natural growth factors. Used for a wide array of procedures, Evosponge DBM Cubes are compressible and elastic bone allografts, with the open, porous structure of cancellous bone.

SYNTHETIC GRANULES IN COLLAGEN

Evologics Bi-Ostetic Granules are composed of Tricalcium Phosphate (TCP) and Hydroxyapatite (HA), creating a synthetic bone filler designed for slow resorption. Providing for optimal osteoconduction, Bi-Ostetic Granules are porous and spongy, mimicking cancellous bone chips, and can enhance complete bone in-growth. Uses include spinal fusion, hand and foot surgery, fracture repair, hip revisions and joint reconstruction.

FOOT WEDGES

Evologics Foot Allograft Wedges are pre-shaped, eliminating the need for intraoperative shaping. Two cortical sides offer enhanced structural strength, and each donor is carefully evaluated for cancellous matrix density.

PRODUCTS

EVOGRAFT™ CANCELLOUS CRUSHED CHIPS & CUBES

EVOGRAFT™ DBM Cancellous Crushed Chips are designed to fill bony voids or gaps, providing a scaffold for bone ingrowth with the patient's own bone. A ready-to-use alternative to autograft for bone regeneration, Evograft Cancellous Crushed Chips can be used to augment autologous cancellous or corticocancellous grafts, and used in craniofacial surgery, spinal fusion, hand and foot surgery, joint reconstruction and fracture repair.

EVOGRAFT™ TENDONS

Evologics EvoGraft™ allograft tendons are sterilized using the exclusive PASCO₂® process that leaves allograft tissue with more tensile strength and elastic properties than traditional methods like gamma irradiation. Using supercritical carbon dioxide, unwanted compounds are extracted while preserving the tensile and elastic strength of the tissue.

AMNION PATCHES

Evologics Amnion EvoPatch products are single- and dual-layer amniotic tissue membrane minimally manipulated to protect the collagen matrix and its natural properties. The Evolugics Amnion Patch is commonly used to reduce scar tissue formation, reduce inflammation at the surgical site, healing enhancements and barrier protection. Evolugics offers a single-layer and dual-layer patch. Both contain the same growth factors, but the single-layer graft can provide more comfort due to its soft and pliable design.

PRODUCTS

LIQUID AMNION

Evologics Fluid Amnion and EvoFlow products are versatile, powerful tissue that supports the development of the fetus in utero. It is used for various types of surgical procedures, and can also be used for wound care and soft tissue injuries. Evologics is proud to partner with industry leaders that use stringent sterilization processes designed to maintain biocompatibility and integrity. Liquid Amnion can be used in wound management, chronic and non-healing dermal wounds, cutaneous wound care, reconstructive surgery, burn care, trauma and more.

EVOGRAFT™ DBM FIBER BOATS

EVOGRAFT™ demineralized cortical bone fibers that are entangled and shaped into sizes engineered to complement specific surgical applications. This unique process creates an interconnected graft material that contains BMPs and other growth factors necessary for the promotion of new bone formation. Evologics allografts are flexible upon hydration and each allograft has a sterility assurance level of 10^{-6} via e-beam sterilization.
